Background

With a working background in sales but a big passion for technology and programming, in 2018 I decided to follow my passion and dedicate my full time to study Full Stack Development. Back then, I was very familiar with technology (using MS-DOS as a kid) but haven't really written any code. Now I can say I learned a lot about JavaScript, ES6, Git, Node, Express, MongoDB and I am learning React. Although I still have no working experience in the field, I can safely say that I can develop web applications and work with databases.
